itztonye@gmail.com

Lagos, Nigeria

## EXPERIENCE

### UI/UX Designer

#### MKOBO Microfinance Bank

Lagos, Nigeria

<https://mkobo.com.ng>

- A microfinance bank conceived to help solve consumers' need for access to short-term emergency credit
  - Designed solutions for web, and mobile products. Engaged critical user based decision in designing the products.

### UI/UX Designer and Developer

#### SWinvoice

Lagos, Nigeria

<https://swinvoice.com>

- Online invoicing platform for businesses
  - Initialized the base frontend build process and structure.
  - Developed solutions primarily for the web platform, engaging in all stages of the product's lifecycle.

### UI/UX Designer and Developer

#### Softcom Ltd

02/2018 - 08/2018

Lagos, Nigeria

<https://softcom.ng> <https://eyowo.com> <https://app.eyowo.com> <https://cpc.gov.ng>

A thinking company on a mission to connect people and businesses with meaningful innovations

- Eyowo
  - Initialized the base front end build process and structure.
  - Worked with both Agile and Waterfall workflows.
  - Conducted UX tests to evaluate the usability of the website and app across all platforms, especially mobile.
  - Worked alongside other designers to ensure accurate development of mockups and noting concerns or recommendations where necessary.
  - Developed solutions primarily for the web platform, engaging in all stages of the product's lifecycle.
- Consumer Protection Council
  - Revamped/Redesigned both the UI/UX of the council's website.
  - Developed and designed the UI for both the platform and council's web pages.
  - Executed and contributed to the development of the site with emphasis on frontend features, usability, and cross-browser compatibility.

### Frontend Developer

#### Rudigo

Rivers, Nigeria

A software company with an aim to provide help to upcoming developers and designers in Nigeria to meet the needed demand of more technical talent in the technology sector of the country.

## STRENGTHS

- **Organisation and planning**

I understand that the success or failure of any endeavor is significantly affected by careful and coordinated focus-driven attempts to execute independent tasks.
- **UX Design**

I've learnt to follow every user through the entire process of using any product I design. This helps me to think carefully about the flow of an overall design.
- **UI Design**

I'm aware of a significant number of the constraints of web technologies and tailor my UI designs to match what is feasible and attainable while maintaining modern trends.
- **UI Development**

I've learnt to use appropriate markup and proper styling for UI components from small to large scale products on the web while using less code and/or external libraries where necessary to enhance the performance of web products.

## EDUCATION

### B.Sc Mathematics and Statistics

#### University of Port Harcourt

09/2011 - 11/2015
